Headline: Transiting to a circular economy

---

- Resource-limited Singapore needs to reduce, reuse and recycle to minimise waste according to Senior Minister of State, Ministry of the Environment and Water Resources & Ministry of Health, Dr Amy Khor, at Eco Action Day.
- Dr Khor highlighted the concept of a circular economy where resources are recycled with biological nutrients returned to the environment for renewal.
- Dr Khor also mentioned that the concept of a circular economy is in line with Singapore's Sustainable Blueprint goal towards a zero-waste nation. In order to adopt the concept of a circular economy, a change is needed in behaviours, mindsets and practices.
